

DO IT YOURSELF ~ CHUTE PLANS

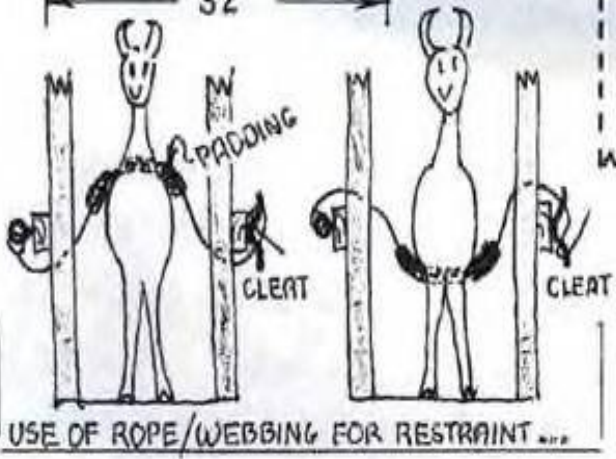

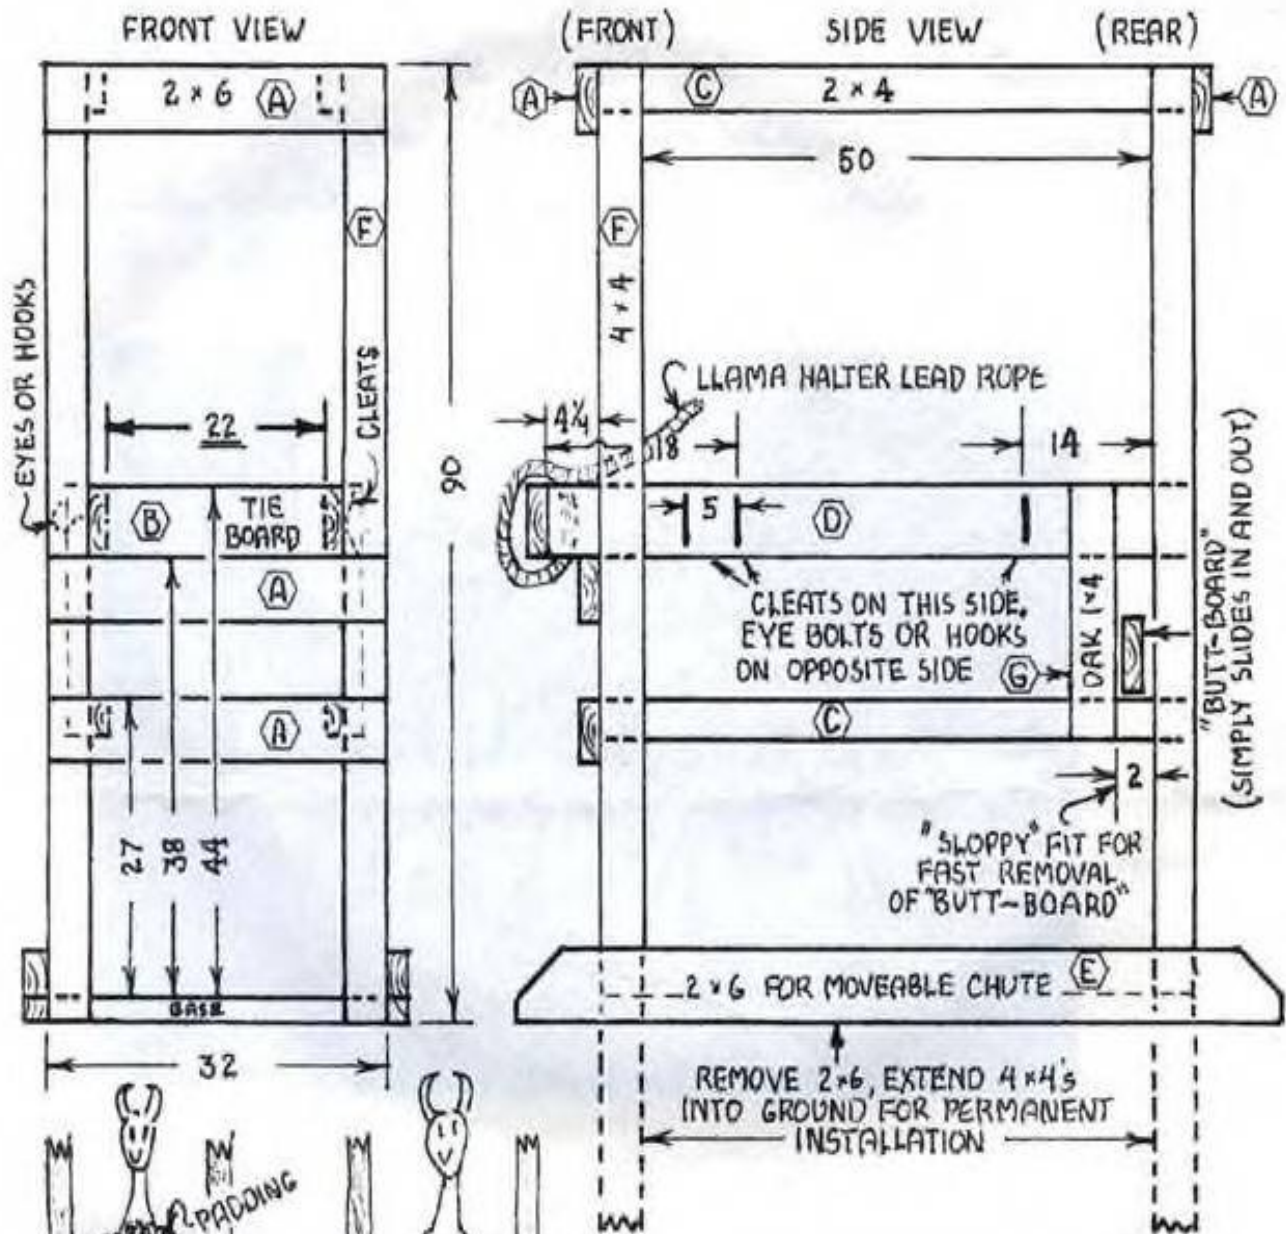

These plans are to construct your own CHUTE. A Chute is helpful in giving your alpaca/livestock inoculations, toenail/hoof trimmings, administering medications, etc.

A chute will give you the additional control of the animal that's sometimes needed to perform these tasks .

These plans were not constructed by me, they have been passed around and shared among alpaca owners/breeders. I do not take credit for the pictures posted in this article.
